

VERBATIM PROCEEDINGS

CONNECTICUT HEALTH INSURANCE EXCHANGE

HEALTH PLAN BENEFITS AND QUALIFICATIONS
ADVISORY COMMITTEE MEETING

APRIL 11, 2012

DEPARTMENT OF PUBLIC HEALTH
470 CAPITOL AVENUE
HARTFORD, CONNECTICUT

POST REPORTING SERVICE
HAMDEN, CT (800) 262-4102

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 . . .Verbatim proceedings of a meeting
2 before the Connecticut Health Insurance Exchange, Health
3 Plan Benefits and Qualifications Advisory Committee
4 Meeting, held at the Department of Public Health, 470
5 Capitol Avenue, Hartford, Connecticut, on April 11, 2012
6 at 9:00 a.m. . . .

7
8
9
10 MS. TIA CINTRON: Welcome, and thank you
11 in advance for your help with this effort and for your
12 continued dedication to Exchange development. We are
13 really looking forward to working closely with you in the
14 coming months leading towards State certification.

15 My name is Tia Cintron. I'm the acting
16 CEO of the Connecticut Insurance Exchange, and maybe we
17 can start with some introductions.

18 MS. NELLIE O'GARA: So I'm Nellie O'Gara.
19 I'm going to be your facilitator today. By way of
20 background, I was part of the facilitation of the
21 original stakeholder meetings about a year ago, so some
22 of you I've met before.

23 MR. BOB CAREY: And I'm Bob Carey. I'm a
24 consultant to the Connecticut Exchange. My background is

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 I was the Director of Policy and Development for the
2 Mass. Connector Authority, and, for the last couple of
3 years, I've been working with a number of states as they
4 implement health reform.

5 I've been working with Connecticut for six
6 to eight months on a variety of topics.

7 MS. CINTRON: Could you elaborate a little
8 bit more on your background, though, and why you're
9 involved with this specific Committee? Not to put you on
10 the spot.

11 MR. CAREY: Sure. So at the Connector
12 Authority, I was responsible for the design of what's
13 considered minimum coverage, which translates into the
14 essential health benefits, so, in Massachusetts, as some
15 of you probably know, there's an individual mandate, and
16 people are required to have a minimum level of coverage.

17 That was not prescribed by the law in
18 Massachusetts. That was deferred to the Connector
19 Authority Board, and I was the lead staff person, who
20 handled that.

21 My background really is as a purchaser of
22 health benefits. I worked for a number of years for the
23 State Employees Group Insurance Commission in
24 Massachusetts, which covers about 350,000 people, and,

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 so, I've handled all of the procurement of the health and
2 welfare benefits for State employees and retirees.

3 And, so, in particular, my sort of
4 qualifications are that I understand the individual and
5 small group market, particularly as it relates to the
6 minimum standards and the law with regard to actuarial
7 value and the essential health benefits.

8 I'm also working with the federal
9 government as it sets up what's considered what they call
10 federally-facilitated Exchanges, so as some of you may
11 know, in those states that aren't moving forward and that
12 won't be ready, or are unlikely to be ready, in October
13 of 2013 the federal government will come in and run those
14 Exchanges, and, so, the feds are sort of going through a
15 similar process as this in figuring out, okay, you know,
16 what's the benefit package look like, and how do we
17 enroll people, and, you know, essentially setting up 40
18 or 30 or 40 federally-facilitated Exchanges potentially,
19 so I'm doing a little work with them, as well.

20 MS. MARY ELLEN BREault: Mary Ellen
21 Breault. I'm the Director of the Life and Health
22 Division at the Insurance Department. I've been at the
23 Department for 20 years, and, before that, I worked in
24 the health field at Travelers as a Pricing Actuary, and

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 I've been working with the Exchange for some time now
2 doing various projects, and our division is responsible
3 for approving all the forms and rates in the State of
4 Connecticut, and we keep up with the legislation, and I'm
5 kind of for the Department making, just kind of
6 coordinating the efforts with our various divisions on
7 different aspects of the Exchange.

8 MR. STEVE FRAYNE: Steve Frayne. I'm the
9 Senior Vice President of the Health Policy at the
10 Hospital Association.

11 MS. JENNIFER JAFF: I'm Jennifer Jaff.
12 I'm the Executive Director of Advocacy for Patients with
13 Chronic Illness.

14 MS. MARY FOX: I'm Mary Fox. I'm retired
15 from Aetna two and a half years. My most recent
16 responsibilities there were product design, development,
17 innovation, as well as P and L responsibility for the
18 operations for those products.

19 DR. ROBERT McLEAN: I'm Robert McLean.
20 I'm a Primary Care Internist and Rheumatologist in New
21 Haven. I'm here, because I'm very active in the State
22 Medical Society, largely through my role as Governor of
23 the Connecticut Chapter of the American College of
24 Physicians, where I'm involved in a lot of their National

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Health Policy Initiatives for the last decade.

2 MS. DEIRDRE HARDRICK: I'm Deirdre
3 Hardrick, and I am a Program Manager at Aetna in the
4 Exchange Project Management Office. My background is
5 public health, health policy, as well as provider
6 contracting --

7 MS. GLORIA POWELL: I'm Gloria Powell.
8 I'm a Nurse Consultant for the Department of Public
9 Health. I work in the Comprehensive Cancer Program,
10 where I oversee Quality Assurance, Case Management,
11 Professional Development.

12 MS. ANNE MELISSA DOWLING: I'm Anne
13 Melissa Dowling, and I'm the Deputy Commissioner of
14 Insurance for the State, and, prior to that, my career
15 was in investments and insurance with Mass. Mutual,
16 Travelers and Aetna, and I am the Department's member on
17 the Exchange Board.

18 MR. BOB TESSIER: I'm Bob Tessier. Along
19 with Mary and Melissa, I'm a member of the Board of
20 Directors of the Exchange. I'm also the Executive
21 Director of the Connecticut Coalition of Taft-Hartley
22 Health Funds, which is a coalition of Union management-
23 sponsored, self-funded, self-insured health plans.

24 MR. JOSEPH TREADWELL: Hi, I'm Joe

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Treadwell. I'm the Legislative Chair of the Connecticut
2 Advisory Association. I serve as the Director of the
3 Yale Surgical Residency Program, and I'm the Director of
4 the Joslin Diabetes Center, so my background is in
5 chronic illnesses.

6 MS. MARGHERITA GIULIANO: And I'm Marty
7 Giuliano. I'm the Executive Vice President of the
8 Connecticut Pharmacists Association, and I'm a
9 Pharmacist, as well.

10 MS. CINTRON: Thank you very much, again,
11 and welcome. I want to just go over a few logistics, and
12 then I'm going to be turning it over to our facilitator
13 and our subject matter expert, Bob.

14 We want to talk a little bit about the
15 focus of this Committee today, go through a draft of
16 guiding principles for discussion and review. We want to
17 look at in detail the priority tasks for this Committee,
18 again, gearing towards our end goal at the end of this
19 year, State certification, and then talk about Next
20 Steps, and we'll also have 15 minutes, as appropriate,
21 for public comment at the end of this meeting.

22 So, with that, we are, again, really kind
23 of singularly focused for the next nine months on State
24 certification, which is an operational, comprehensive

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 operational overview of our business operations and IT-
2 related system functions for the Exchange, so, in the
3 next few months, we go through a series of three formal
4 gate reviews, as they're called in D.C., where we look at
5 planning design and implementation.

6 We just went through our first pre-
7 planning review in D.C. last week and successfully talked
8 through approach and kind of our thoughts, in terms of
9 Next Steps, so we have a lot to accomplish, and, as you
10 know, these four Advisory Committees were developed to
11 focus in on this nine-month period primarily to achieve
12 all of the objectives that we need to successfully apply
13 and go through certification.

14 We know that each of these Committees will
15 be very integrally related and need to be cross-walked,
16 so Bob will be talking about that matrix and how we're
17 going to all work together.

18 So we have kind of outlined by month the
19 tasks that this group will need to consider and make some
20 decisions around, and, again, Bob will be walking us
21 through that today.

22 Just to give you a visual, every month,
23 there's going to be some work that we need to address
24 collectively. Anything else? So, with that, Bob, I'll

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 turn it over to you.

2 MR. CAREY: Okay, so, as you know, there
3 are four Advisory Committees that we established, and we
4 tried to delineate each Advisory Committee's
5 responsibilities, but there's overlap across each of
6 those Advisory Committees, so, yesterday, we met with the
7 Brokers, Agents and Navigators Advisory Committee and
8 with the Consumer Experience and Outreach Advisory
9 Committee, so there are responsibilities in each of those
10 Advisory Committees that will likely be affected by the
11 work of this Advisory Committee.

12 So, for example, you all are responsible
13 for recommending the Essential Health Benefits Package
14 that will apply not only to the Exchange, but to the
15 broader individual and small group market, and that's a
16 decision that is not just the Exchange's to make, but the
17 Exchange Board and this Committee has a role to play in
18 evaluating the options and recommending what the
19 Essential Health Benefits Package will look like for the
20 Connecticut marketplace.

21 That also has an effect, we think, on the
22 Consumer Experience and Outreach Advisory Committee, so
23 the way that we have structured the recommending and
24 reporting out is that, for example, with the essential

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 health benefits, this Advisory Committee will review the
2 options and will prepare a recommendation.

3 That will, then, go to the Consumer
4 Experience and Outreach Advisory Committee for them to
5 review and to comment on, and will then be brought to the
6 Board, so we think that there's necessity to coordinate
7 activities across these Advisory Committees, so there's a
8 number of ways in which we'll do that.

9 One is that the meetings are open to the
10 public, the information is posted publicly, and Advisory
11 Committee members of various Advisory Committees can sit
12 in and monitor or just understand what's happening within
13 each of the Advisory Committees.

14 The second way in which we'll be able
15 hopefully to coordinate the activities of the Advisory
16 Committees is that the Board co-Chairs of each Advisory
17 Committee will report each Board meeting to the broader
18 Board about what the Advisory Committee has been doing to
19 just inform the rest of the Board and to allow feedback
20 and discussion amongst Board members, so we think that's
21 an opportunity for understanding what's happening and the
22 path that will be taken by each of the Advisory
23 Committees.

24 The second way in which we are hopeful

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 that there will be some common approach to these issues
2 is that we're going to walk through draft guiding
3 principles, and, so, we put together these draft
4 principles for each Committee.

5 They're slightly different for each
6 Committee, because each Committee is responsible for
7 different aspects of the Exchange, but we think that that
8 common framework and sort of a manner by which you can
9 make decisions that use the guiding principles as a check
10 against your approach will be helpful, we think, in
11 minimizing any conflicting recommendations that may come
12 out.

13 So, for example, this Advisory Committee
14 is responsible for making recommendations on the numbers
15 and types of health plans that will be offered through
16 the Exchange, and the Consumer Experience and Outreach
17 Advisory Committee may have an opinion on that, in terms
18 of how many plans should be offered, and what the
19 Consumer Experience looked like, and, so, we want to make
20 sure that there's some common guiding principles across
21 Advisory Committees, and we think that that will be an
22 important way in which we can insure that there's a
23 minimum amount of conflict amongst the Advisory
24 Committees.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 And, so, we're going to go through, and
2 the discussion yesterday in both of the Advisory
3 Committees really got down into some specific details
4 about what do you mean by, you know, each of these
5 guiding principles?

6 And these, again, are drafts. These are
7 suggestions that we put together. We welcome additional
8 guiding principles that you may have, and you certainly
9 will, you know, beat up each one of the principles that
10 we put together, so those are sort of the three ways we
11 think we'll be able to manage the process as we move
12 forward.

13 We do have some tight deadlines. For
14 example, the Essential Health Benefits Package. In order
15 for health plans to offer products that will be offered
16 in October of 2013, we need to make decisions in 2012
17 about what the Essential Health Benefits Package looks
18 like, how many plans are we going to offer, what's the
19 structure of those plans, so, you know, January 2014 may
20 seem, you know, a long way off. It's not, particularly
21 for health insurers, who have developed products that
22 meet the requirements that we're going to set.

23 For those of you, who weren't familiar
24 with the way in which health plans are developed, it's

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 not an overnight process, and it takes time to put
2 together a benefits package that's consistent with
3 whatever requirements we put forward.

4 I think that folks around the table
5 understand that. I just want to emphasize that, in terms
6 of the necessity to move pretty quickly through some of
7 these issues and make decisions and move forward.

8 The other thing I'll just say, in closing,
9 on sort of guiding principles and Committee overlap is
10 that, you know, the Exchange in 2014 will look very
11 different than the Exchange in 2016, and it will look
12 different than the Exchange hopefully in 2018, and it's
13 not a one-off deal, and there will be ways in which
14 you'll be able to refine decisions.

15 So while we have to make decisions in 2012
16 for 2014, it's not the end of the game, and we'll learn
17 from the mistakes that we make in 2012 as they affect
18 2014 and be able to modify things as we move forward, so
19 just this isn't the end of the discussion, but we do
20 think that time is of the essence, and we need to move
21 forward pretty quickly.

22 I don't know if folks have any questions
23 about that. There was a recommendation at one of the
24 Advisory Committees that there be a designated person

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 from that Advisory Committee, who serves as a liaison to
2 each of the four Advisory Committees. I don't know if
3 that's something that this Advisory Committee may want to
4 formalize or not, but that was just a recommendation I
5 just wanted to share with the group.

6 MS. O'GARA: Okay. Any comments or
7 questions of Bob or Tia as we get started? Okay. A
8 couple of sort of operational items. We are recording
9 this session, so I am Nellie O'Gara going on record, and
10 when you speak, if you'd say your name? Sometimes I'll
11 say it, take care of it for you. The other thing is the
12 bathrooms are on the other side of the soda machine.

13 Finally, we have been working with the
14 other Committees in a suggested way, that when we are
15 looking at documents for review and comment, we will try
16 to reflect the majority support, the consensus of the
17 group, but when you're making recommendations, we will go
18 to a formal vote, so we have a record of those pro and
19 those against, okay?

20 Having said that, if we could put up the
21 principles here? The first one, what we want to do is
22 get your perspective on what we've suggested for your
23 consideration.

24 You may want to modify these. You may

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 want to add to them. So we'll go through each one, one-
2 by-one, and I'll ask for your perspectives. The first
3 one has to do with affordability. Affordability is a
4 (feedback) and is essential to the ability of Connecticut
5 residents to retain and maintain access to health care
6 and health insurance. So that's one of the guiding
7 principles we're suggesting.

8 Is that meaningful to you? Dr. McLean,
9 you're saying yes?

10 DR. McLEAN: Yes, very much so. Good
11 number one.

12 MS. O'GARA: Good number one? Anyone else
13 want to weigh in on that? Bob?

14 MR. TESSIER: Agreed.

15 MS. O'GARA: Jennifer?

16 MS. JAFF: My concern would be that
17 placing affordability above all other goals, I'm
18 concerned about the other goals getting kind of lost in
19 this.

20 I'm also on the Consumer Outreach and
21 Experience Committee, and one of the issues that a
22 consumer brought up yesterday is affordability, so it's
23 absolutely essential for consumers, and we don't in any
24 way dispute the importance of affordability, but there

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 are other concerns, like adequate coverage and adequate
2 network, provider networks and so on.

3 So my only concern is that this appears to
4 place affordability above all else, rather than on the
5 kind of same line as other very important goals, like
6 coverage of as many people, who are uninsured, as
7 possible and so on.

8 MS. O'GARA: I'm not sure we were
9 suggesting an order, so you can --

10 MS. JAFF: No. It's the paramount.

11 MS. O'GARA: Okay. Mary?

12 MS. FOX: I would echo Jennifer's concern,
13 that maybe the number one priority should be the consumer
14 experience and that the needs are met, affordability
15 being one of the critical ones, but, you know, addressing
16 a number of the other principles, which we see already,
17 and some, which I think will come up in the discussion.

18 MS. O'GARA: Are you suggesting, Jennifer,
19 we choose another word in front of importance?

20 MS. JAFF: Yeah. I mean I think to say
21 it's of great importance would certainly be accurate, and
22 that would reflect the consumer experience, certainly.

23 MS. O'GARA: Okay. I'm sorry. Bob
24 McLean?

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 DR. McLEAN: Yeah. I would have to
2 differ. I think, if someone can't afford it, it's a moot
3 point, so if they're not able to get it, because they
4 can't afford it, the rest of it is irrelevant, so I
5 think, quite frankly, it is of paramount importance,
6 because, otherwise, they're not even getting -- they're
7 not getting it.

8 MS. O'GARA: Deirdre, you would like?

9 MS. HARDRICK: And I would say that
10 (indiscernible - too far from microphone) maintain, but I
11 think we should have obtain.

12 MS. O'GARA: Obtain?

13 MS. HARDRICK: Obtain for consideration.

14 MS. O'GARA: What about the -- the public
15 comment will come.

16 MS. MARIA DIAZ: Pardon me.

17 (Indiscernible - too far from microphone)

18 MS. O'GARA: We want you up here. There's
19 another seat here.

20 MS. DIAZ: Maria Diaz.

21 MS. O'GARA: Thank you. All right, so, we
22 have a couple of comments here, suggesting that we
23 consider changing the word paramount to great, that we
24 add the word obtain, and that this is still of

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 importance.

2 So why don't we put this as I revised it,
3 and we can come back to it and see if we've hit on all
4 the other items that are important, too. Is that all
5 right with everybody?

6 The second guiding principle that's
7 suggested is the Exchange should offer consumers
8 meaningful choice of high-value qualified health plans
9 that meet the diverse needs of Connecticut residents and
10 businesses. So a couple of items there are choice, high-
11 value qualified health plans, and both for Connecticut
12 residents and businesses.

13 DR. McLEAN: I think those are all kind of
14 phrased to that particular need in this environment, so
15 they're appropriate to be there, so I think that states
16 it well.

17 MS. O'GARA: And that was Bob McLean. And
18 Jennifer?

19 MS. JAFF: Just do we want to say small
20 businesses, as opposed to businesses, since the Exchange
21 won't, at least to start out with, will only be dealing
22 with small businesses?

23 MS. O'GARA: Has that been decided?

24 MR. TESSIER: It's the law. It is the

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 law.

2 MS. JAFF: It's a given.

3 MS. O'GARA: So what's the feeling of the
4 group? Are we adding small? There's a no there.

5 MR. TREADWELL: I think it's more accurate
6 to say small. I agree with that.

7 MR. TESSIER: One option is it's going to
8 be a fluid document over the years. We're not allowed to
9 be fluid, and businesses can incorporate whatever the law
10 needs. It doesn't supersede the law. It just follows
11 the law, so if you use businesses, you're just going to
12 have to change the guiding principle in three years to
13 say, okay, now it's going to be 150, so that can follow
14 with small businesses nationally, change the law.

15 MS. O'GARA: What's the consensus of the
16 group on that? Leave it as businesses? I'm seeing four
17 or five heads shaking yes. Six.

18 All right, the third item is on
19 competition. The Exchange should promote competition
20 among health insurers, based on price, quality and
21 service. Yes?

22 MS. DOWLING: Anne Melissa Dowling. I
23 think this is critical to make sure we have enough
24 carriers participating, so that it doesn't get lopsided

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 and we're limited, so we have to make sure that we create
2 an environment through the Exchange and at the State that
3 allows competition.

4 MS. O'GARA: Do we say it in here in a
5 good way on this particular one?

6 MS. DOWLING: I think so. I mean the word
7 promote can be a little bit loaded. We want to be
8 careful, but I think should encourage, support, whatever.

9 MS. O'GARA: Okay. We could change that
10 word to encourage and support.

11 DR. McLEAN: May I?

12 MS. O'GARA: I'm going to take Mary, and
13 then we'll come to you, Bob.

14 MS. FOX: I would just like to see
15 something about supporting innovation, as well. I think
16 the Exchange has an opportunity to really move forward,
17 in terms of supporting delivery of quality health care
18 and as the providers move forward and change their
19 paradigm for delivery of care, more focused on chronic
20 disease management, on wellness, all the things that, you
21 know, are kind of underway. Now we want the flexibility
22 and I think a real driver around pushing the plans to
23 support that kind of progress.

24 MS. O'GARA: Mary, I'm going to ask if you

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 could hold back and go to the last principle. We can put
2 that in there until we talk about --

3 MS. FOX: -- innovation there.

4 MS. O'GARA: Yeah, put innovation in.

5 DR. McLEAN: I agree, too, with what she
6 said. I think that a lot of what she's referring to is
7 encompassed in that high-value qualified health plans in
8 number two. I agree with stating it wherever possible,
9 but I think that high-value qualified health plans has
10 very specific meaning, at least in a provider community,
11 right now.

12 MS. O'GARA: Do we want to explain that in
13 this particular principle by putting some --

14 DR. McLEAN: I don't think you want to add
15 that.

16 MS. O'GARA: Okay.

17 DR. McLEAN: It's broad enough.

18 MS. O'GARA: Well let's not lose Mary's
19 comment, and see if you think in the last one we can
20 emphasize that.

21 DR. McLEAN: I think an initiative in the
22 last -- innovation or something in that last
23 recommendation of principles.

24 MS. O'GARA: Okay. Jennifer?

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MS. JAFF: I'm kind of not sure where the
2 consumer comes into this guideline. Do we mean quality
3 of insurance coverage, or quality of health care, and
4 service to consumers, or service to plans? I think it
5 would be helpful if we fleshed out those two words a
6 little bit, quality and service.

7 MS. O'GARA: So I'm going to ask Bob.
8 When you were putting this draft together, were you
9 thinking more on the insurance side, the health insurance
10 side?

11 MR. CAREY: Well what I was trying to do
12 was to, with these price, quality and service, was to
13 move away from, you know, risk selection, or any other
14 ways in which insurers can compete and, rather, allow the
15 consumer to choose from amongst plans that are competing,
16 based on the quality of the service they provide and the
17 types of services they provide and price, which I think
18 are of paramount importance, and, so, that's sort of the
19 concept of an Exchange, is to allow for, you know, a
20 level playing field within which or upon which health
21 insurers compete for customers by offering, you know,
22 high-quality plans that provide good service to the
23 consumer and that are competitive, based on price.

24 MS. O'GARA: So can we just wait until

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 these gentlemen can come and join us?

2 MR. MARK ESPINOSA: I hope the formation
3 of the Committee is better than the directions.

4 MS. O'GARA: I apologize.

5 MR. ESPINOSA: I was in the Capitol
6 building. We were at Room 310. Sorry we're late.

7 MS. O'GARA: And who is joining us?

8 MR. ESPINOSA: My name is Mark Espinosa.

9 MS. O'GARA: Hi, Mark.

10 MR. KEVIN GALVIN: And I'm Kevin Galvin.

11 MS. O'GARA: Okay, so, you can come around
12 this way. We'd be happy to wait. There's a chair right
13 here, and then maybe, Mark, you can pull up a chair there
14 next to Jennifer. That would be great.

15 We've just begun discussing the guiding
16 principles, and we're working our way through this third
17 one here. What's been suggested is that we change one
18 word so far. The Exchange should encourage and support
19 competition among health insurers, based on price,
20 quality and service. Yes?

21 MR. TESSIER: Bob Tessier. I just have a
22 couple of comments. It sounds like, to go back to
23 Jennifer's question, it sounds like, Bob, we're talking
24 about consumer or customer service, so it might be

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 helpful to clarify that.

2 MS. O'GARA: Okay.

3 MR. TESSIER: And the other comment I
4 wanted to make, and I'm trying to figure out whether we
5 can incorporate or combine this thought with Mary's
6 suggestion earlier, I like the way it's drafted. I think
7 it's simple and direct, and it's important that we are
8 clear that one of the guiding principles is that we want
9 to promote competition among insurers for the benefit of
10 consumers.

11 What I want to add is, in addition to
12 price, quality and service, whether, or throw out for
13 discussion, is whether we can add problems, and I think
14 what I'm thinking of is that that would mean competition
15 among innovative products along the lines of what Mary
16 described earlier, so I'm wondering if that's a helpful
17 thing to add.

18 MS. O'GARA: Interesting. Okay, so, what
19 we could do with that, to capture your thought, Bob, I
20 have the Exchange should encourage and support
21 competition among health insurers to benefit, to the
22 benefit of consumers, based on price, quality, service
23 and innovative products.

24 And I'm going to go to Steve and then to

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Bob. Steve?

2 MR. FRAYNE: Steve Frayne. I'm not sure
3 that's accurate. I think it's (papers on microphone) I'm
4 not sure it's accurate what's written on this one, and
5 that is I'm assuming the purpose of the competition among
6 the price, quality and service is so that consumers
7 actually have the ability to choose, based on those
8 parameters, but, as it's written right now, it doesn't
9 actually say that you're going to make the information
10 available.

11 So it doesn't say right here you make
12 meaningful information available, so that consumers can
13 actually choose, based on price, quality. To just have
14 insurers compete on that basis is kind of fine, but if no
15 one actually has access to the meaningful information and
16 that they can personally decide that, you know, how these
17 things come together, that would be a problem.

18 MS. O'GARA: Do we need to add that as a
19 specific principle?

20 MR. FRAYNE: I don't know if you want to
21 have it as a separate principle, or just to incorporate
22 it into it, something along the lines of to promote
23 competition among health insurers and make available
24 information, so that consumers can choose, based on

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 price, quality and service.

2 I mean it seems to me the essential
3 ingredient is that information is available, so consumers
4 can choose, not the fact that they're competing.

5 MS. DOWLING: Do you think that it's
6 covered in the second bullet? We were just chatting over
7 here, whether maybe that was the place to offer
8 meaningful choice. Maybe there's a way to get it there.

9 MR. FRAYNE: Well I think the question I
10 have in my mind is whether folks review this as the
11 insurers have to decide that they're competing amongst
12 themselves, so that's kind of enough, versus how do
13 people, who are actually looking at this, know, and I
14 think we wanted to make sure that it's not only the
15 competition, but that it's publicly available
16 information.

17 MR. TESSIER: I actually think that's an
18 important distinction, and I have been thinking of it as
19 a separate issue and was thinking about how we want to be
20 clear, and, Bob, you may have previous experience with
21 this in Massachusetts, how one of the things that makes
22 insurance, health insurance so confusing for consumers is
23 just the volume of information and sorting it through,
24 and how does one product, one plan compare to another, so

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 how do we provide?

2 It goes to the word Anne Melissa focused
3 on, meaningful access, or meaningful choice. I tend to
4 think that it's even a separate and bigger issue, but I
5 agree with the basic point that you're making, Steve.

6 MS. O'GARA: So we have a couple of
7 options. Yesterday at the meeting you were at, Jennifer,
8 we had a principle that got out a lot of what you thought
9 of, but it did not reflect that the information was going
10 to be provided, so, therefore, they could make a choice,
11 so if what we could do, Steve, if you don't want it as a
12 separate one --

13 MR. FRAYNE: I think maybe a separate is
14 fine. We could make this an extraordinarily long list,
15 and then it becomes so tedious, so I'm fine with adding
16 it as a separate issue, if that's a cleaner way to do it.

17 MS. O'GARA: Okay.

18 MR. FRAYNE: I just think making sure it's
19 public information is essential.

20 MS. O'GARA: So we could say the Exchange
21 should make available meaningful information, so
22 consumers can --

23 A MALE VOICE: Meaningful, understandable
24 information.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MS. O'GARA: Yeah. Well, actually, they
2 have -- the group had a very good guiding principle. If
3 you want to incorporate theirs, I can read it to you.
4 Okay. Let me go back.

5 Consumers should be provided information
6 on, meaningful information on outreach, pre and post-
7 enrollment and coverage options that is understandable
8 and accessible in multiple formats.

9 For example, we talked about internet
10 website, telephonic, sign language, and in multiple
11 languages. That's one.

12 Then we went on to a number of different
13 ones, so there's about six that they pad with consumer
14 information, but we didn't have this particular one on
15 meaningful information to make a choice, so I'm happy to
16 craft something for your consideration at the next
17 meeting that gets out there, if you'd like us to do that.

18 DR. McLEAN: I don't see how that adds
19 anything to what it already states. Offer consumers
20 meaningful choice. They have to be educated to make a
21 meaningful choice, to kind of circling around and saying
22 -- is already written there, I think.

23 MR. FRAYNE: The reason I was making this
24 statement, maybe the analogy I'm using was, for example,

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 hospitals think that they compete every day on price,
2 quality and service. There's a huge difference when that
3 information is then made public and is reported, so that
4 others can actually decide for themselves whether or not
5 they're meeting the test of price, service and quality,
6 so I think they really are two very different things.

7 MS. O'GARA: So what if we did this,
8 Steve? What if we did add to that second bullet the
9 Exchange should make available meaningful information to
10 consumers, so that they can make an educated choice
11 between high-value quality health plans, da, da, da, da,
12 da.

13 MR. TREADWELL: In a simplified way?

14 MS. O'GARA: In a simplified way. I mean
15 I'll simplify it, okay?

16 MR. TREADWELL: Two or three points. Make
17 it like two sentences.

18 MS. O'GARA: Well let's see if we can do
19 that.

20 MR. TREADWELL: I like his idea on making
21 it a separate point, because once you start --

22 MS. O'GARA: Yeah.

23 MR. TREADWELL: -- paragraph for a
24 principle. Make a separate bullet and move on.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MS. O'GARA: Okay. Jennifer, one more
2 comment?

3 MS. JAFF: Yeah. I think it's really
4 important, actually, to make it a separate bullet, I
5 think because these guiding principles kind of all start
6 with the Exchange should, and, so, this is a place where
7 we can say that the provision of information to consumers
8 is one of the main tasks of the Exchange, the main
9 purpose of the Exchange, which it is, so I think it
10 deserves its own bullet.

11 MS. O'GARA: Okay. All right, I'll bring
12 it back to you for your consideration. Then the next
13 two, the Exchange should offer qualified health plans
14 that allow consumers to receive care for diverse networks
15 of physicians, hospitals and other health care providers,
16 including providers that served underserved areas in the
17 State.

18 Can I hear from some people that we
19 haven't heard from? Let's hear reaction to that. Is it
20 meaningful the way it's stated? Yes?

21 MS. DOWLING: I'm Anne Melissa Dowling.
22 I'm interested in the thinking when the Exchange is going
23 to serve the entire state. What was in forming that last
24 clause that we need to break out the underserved areas?

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Is there a reason we need to break that out versus
2 suggesting that up in the beginning we say to all areas
3 of the State, but there might have been something behind
4 this I just didn't know about?

5 MR. CAREY: Yeah. The intent of that is
6 to get at the requirement under the federal rules, that
7 provider networks include essential community providers,
8 which are providers that serve maybe areas is not the
9 proper term. It could be populations or groups.

10 It's really getting at those individuals
11 in populations that have maybe not historically, but more
12 recently been less served, in terms of their access to
13 providers, so it's getting at really the essential
14 community providers that I was saying, because then
15 you'll have to define, well, what do you mean by
16 essential community providers, so I think maybe
17 underserved, or groups, or populations might be better
18 than areas.

19 MS. DOWLING: Thank you.

20 MS. O'GARA: So could we change that to
21 underserved populations?

22 MR. CAREY: That's the intent.

23 MS. O'GARA: Would that be better? I have
24 three comments back here. Mary, I think you had your

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 hand up?

2 MS. FOX: I think that, if you play this
3 out, in terms of being able to measure the impact of the
4 Exchange, I think the intent here, I hope, is to get at
5 things like disparities in health care, so the
6 underserved areas are going to get special focus here.
7 They haven't been served by, you know, the commercial
8 market.

9 I think it's very important. It's less
10 important exactly how it's said, just that we do follow
11 through on the impact piece of that.

12 MS. O'GARA: Okay.

13 MS. FOX: The other thing is -- I'll leave
14 it at that.

15 MS. O'GARA: Steve?

16 MR. FRAYNE: Steve Frayne speaking. I'm
17 not sure what you're intending by the word diverse. I
18 mean it seems to me that the standard has to be some
19 level of access and whether one wants to define it as
20 reasonable access, or adequate access, or robust access.

21 Diverse, to me, seems like kind of a
22 strange way to describe the collection of folks that
23 you'd want to have in the network.

24 MS. O'GARA: -- at some other piece, Bob?

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MR. CAREY: Yeah. Anne is trying to get
2 this issue of, you know, providers that may serve a
3 particular population, and that, I think, is what I'm
4 trying to capture. The focus is that the provider
5 networks need to be represented about the populations
6 that they'll serve, or represented -- need to be
7 appropriate for the populations that they will serve and
8 will have access in those communities to providers.

9 COURT REPORTER: One moment, please.

10 MS. FOX: Quality into that statement,
11 also, and it's diversified, but I think that's critical,
12 also. And if we're looking at affordability and managing
13 all that, I think the focus on quality is going to be
14 important.

15 MS. JAFF: I agree with changing
16 underserved areas to underserved populations. I think
17 that's a broader focus, so that was one of my points, and
18 with respect to the diverse networks, I don't have a
19 problem with the word diverse, but I absolutely agree
20 with Steve, that what's really critical here is the
21 adequacy of the network, and I think quality is obviously
22 also terribly important, so perhaps we can take diverse,
23 quality and adequate networks, something along that line,
24 both lines.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MS. O'GARA: Okay. We can put those in.
2 Thank you. Dr. McLean?

3 DR. McLEAN: Robert McLean. While I think
4 the meaning of underserved is actually meant to be broad,
5 while I do agree that population is probably one of the
6 intent there, I think especially the parts of our state
7 that are relatively underserved, I think having a
8 geographic area has some implication that probably
9 warrants it, so a population and geographic area I think
10 is what you both are aiming to and I think is important
11 for especially the eastern part of the state that is
12 geographically underserved.

13 MS. O'GARA: We can add that. Anything
14 else? Joe?

15 MR. TREADWELL: Joe Treadwell. I guess
16 I'm just finding it difficult to understand. I get the
17 intent. I'd almost rather get rid of receive care from a
18 diverse access, receive care from diverse networks and
19 have consumers to have ready access to physicians,
20 hospital and other health care providers, including in
21 the underserved areas.

22 To me, what it's really trying to get to
23 is the access. Who cares if you've got a lot of
24 physicians in an area? If they're not on that plan, you

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 don't have access. That's never the problem. There's
2 always a physician in the areas, but do you have access
3 to that physician?

4 MS. O'GARA: Let me read back to you how
5 this might incorporate a number of -- let's see if it
6 doesn't get too wordy, okay?

7 The Exchange should offer qualified health
8 plans that allow consumers to have ready access to
9 diverse, quality, adequate networks of physicians,
10 hospitals and other health care providers, including
11 providers that serve underserved populations and
12 geographic areas.

13 MR. TREADWELL: I don't even know if you
14 need the diverse networks, because I think it's kind of
15 assumed that, when you say the word physicians, you have
16 multiple specialties, including underserved providers
17 that serve underserved areas.

18 We're not looking for providers that will
19 serve an underserved area. I would rather see providers
20 within that geographic area. I have people come up to
21 New Britain from Bridgeport, New Haven, all of the
22 eastern side of the state. I'm not easily accessible to
23 them, but I'm the only one who does that type of work for
24 what they need. That's crazy.

POST REPORTING SERVICE
HAMDEN, CT (800) 262-4102

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MS. O'GARA: What is the feeling? Take
2 out the word diverse?

3 DR. McLEAN: Robert McLean here. I do
4 think that the diverse network has some warrants and
5 meaning, because while I agree fully with the ready
6 access, I think that's a wonderful phrase to put in
7 there, because that really gets at the meaning, I think
8 that we're trying to direct that the plans have to have
9 both physicians and hospitals of varying sorts across the
10 state, and I think the diverse network gets at how the
11 plan needs to be set up.

12 It's not just the ready access, which I
13 agree with. It's also we're trying to set out the
14 roadmap of what the plan needs to include, so they have
15 plenty of ready access in one town, but they don't have
16 it somewhere else in the state.

17 The person happens to get sick somewhere
18 else in the state, it doesn't do them any good.
19 Obviously, I think the health plans are going to have
20 statewide plans, but emphasizing the diversity of their
21 network between physicians and hospitals and specialists
22 and all that I think is worth saying.

23 MR. ESPINOSA: May I ask a question?

24 MS. O'GARA: Yes. Mark?

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MR. ESPINOSA: Mark Espinosa. I just want
2 to jump way ahead. My question is, with all this
3 wonderful wordsmithing going on, that's fine, how is,
4 just for my own education, how is the consumer going to
5 be instructed and educated down the road when all the
6 wording and the access attempts fall upon deaf ears?

7 In other words, you know, in my
8 organization, I have 10,000 members in the State of
9 Connecticut, many of whom are young people, under the age
10 of 30. No matter how much I wordsmith insurance letters
11 and pension letters, it inevitably is going to have
12 questions, and we can always sit here and put this word
13 in and put that word in.

14 So my question is how are questions and
15 issues going to be dealt with down the road? Has that
16 been -- how does someone get the information beyond this,
17 is my question?

18 MS. O'GARA: We can answer that with a
19 very thoughtful approach. Do you want to take that, Bob,
20 in terms of the Committees and the group that Jennifer is
21 on?

22 MR. CAREY: Yes. So there's a Consumer
23 Experience and Outreach Advisory Committee, and one of
24 its main responsibilities is to do just that, to help the

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Exchange develop information that's understandable to
2 people, many of whom are uninsured, have never been
3 insured, don't understand insurance, so a focus of that
4 Advisory Committee is to do just that, is to help set up
5 the infrastructure that will be necessary to help people,
6 and we went through this exercise yesterday about it, not
7 just pre-enrollment and during enrollment, but post-
8 enrollment, helping people understand how to use
9 insurance, what it covers, what it doesn't cover, how to
10 help them through with any complaints and appeals that
11 they may have, so that's a focus of that Advisory
12 Committee.

13 And I think, really, a broader focus of
14 the Connecticut Exchange is to help people, again, who
15 will be new to insurance, navigate the insurance
16 marketplace and provide them with the information in an
17 understandable fashion, so that they can maybe form
18 decisions that they can then access the care that is
19 available to them.

20 MR. ESPINOSA: Is that the intention, or
21 is the setup -- is it going to be a centralized brain
22 center? Are there going to be 800 numbers? Is there
23 going to be e-mail?

24 MR. CAREY: That's all part of the package

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 that will be -- we talked yesterday, again, about that
2 the information needs to be made available in multiple
3 formats, meaning web, phone, walk-in center, utilizing
4 brokers and agents, and we had this discussion about
5 navigators, so we recognize that people will need --
6 people receive and process information differently, and
7 there will be a need to help people in multiple ways to
8 navigate their health insurance options.

9 MR. ESPINOSA: One final piece. I'm
10 sorry. The open enrollment period I saw from the
11 guidelines last time I heard you speak at the end of '13,
12 so October or whatever it is.

13 Beyond that period of time, is it a yearly
14 open enrollment? Someone can jump in at any point, or do
15 they have to wait for the next enrollment?

16 MR. CAREY: Currently, the thinking from
17 Washington is that open enrollment is pretty expansive
18 the first year, so their thinking is October 1st through
19 the end of February, so a five-month period, which people
20 will be able to enroll in coverage.

21 After that, only for change in status.
22 Now you lost your job. You're newly uninsured. You
23 moved to the State. There are various qualifications or
24 circumstances that would allow someone to access an open

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 enrollment period or a special enrollment period, but
2 that there be annual open enrollment periods, so perhaps
3 the next October open enrollment again.

4 MR. ESPINOSA: Thank you.

5 MS. O'GARA: This is important, I think,
6 as an example of how you can see the interplay between
7 the Committees, and, so, Jennifer, did you want to add a
8 sentence?

9 MS. JAFF: Did we decide to add another
10 bullet on the Exchange will provide quality information
11 to consumers before Mark got here?

12 MS. O'GARA: We're going to do a separate.

13 MS. JAFF: Yeah, that's what I thought, so
14 I think it was right before you got here, but we, I
15 think, agreed that that would be a separate bullet, the
16 information, because that is critical.

17 MS. O'GARA: Okay. Yes. Margherita?

18 MS. GIULIANO: I'll just add a
19 clarification. Although pharmacists are recognized as
20 health care providers, I'm wondering if we need to
21 articulate that pharmacy networks might be an additional.

22 MS. O'GARA: What's the feeling of the
23 group, because -- and I don't want to deemphasize
24 anybody. We have a lot of other providers, as well.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Yes?

2 DR. McLEAN: This is Robert McLean. I
3 agree fully, actually. I mean I think that, if you're
4 talking about ready access, if someone can't go to a
5 local pharmacy and get the medication they need, that's
6 not ready access, so where more and more plans have
7 understandable contracts with mail aways and stuff, I
8 think somehow having something that they can get what
9 they need when they need it pharmaceutically is logical
10 to include.

11 I don't know how I'd phrase it, but I
12 agree with putting it in there somewhere.

13 MS. GIULIANO: Only because it's slightly
14 different. I mean the pharmacists they might have ready
15 access to a pharmacy, but that might not be practicing in
16 a pharmacy either.

17 MS. O'GARA: I can add that, and, again,
18 you're going to have another take at this next time we're
19 together, so let's see.

20 And then the last one is stated as the
21 qualified health plans offered through the Exchange
22 should promote wellness and health improvement. Mary, I
23 wanted to invite your comment here and see if this is a
24 place that we could emphasize your concern.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MS. FOX: I do think it's a place we could
2 talk about innovation. My ideas and list of things that
3 could be considered in innovation is going to be way too
4 long for a guided principle, but I would not want to
5 limit it just to the wellness and health, so the fact
6 that we put those in there, you know -- I would love to
7 have, you know, products that, and maybe innovation just
8 covers it, but I would love to have products that, you
9 know, focus on pay for evidence-based care, you know,
10 eliminating waste, paying for quality, coordination of
11 care, disease management.

12 It could be quite the laundry list, but
13 the point is we need to move the needle as much as we can
14 in our selection of products that really promote the
15 quality care, you know, as well as the access.

16 MS. O'GARA: So why don't we, for your
17 consideration, say the qualified health plans offered
18 through the Exchange should provide innovative products
19 that include, but are not limited to, wellness, health,
20 and list some of the ones that you came up with?

21 DR. McLEAN: I agree with the intent. I
22 think most of what you're aiming for is included in that
23 high-value qualified health plans in bullet two. I don't
24 know that you want to mandate in a way innovation,

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 because then innovation is not going to work, and I think
2 the insurance companies are smart enough to not go out
3 there and do something kind of silly that's not proven
4 anyway, so some of the buzz words that we've used, high-
5 value plans, as I say, incorporates just about everything
6 that you touched on to the people who know what that
7 means, and the wellness and health improvement we clearly
8 need.

9 Innovation will come, as it's proven to be
10 high-value. And, so, if these companies are going to be
11 making money on health care, they're going to be
12 providing high-value plans, because those are high-
13 quality in their outcomes and all those kinds of things,
14 so I think it's included already.

15 MS. O'GARA: So I have a couple of hands.
16 Anne Melissa?

17 MS. DOWLING: I think it's been
18 distributed to all of you, but perhaps not and will be,
19 the guiding principles for the Exchange as a whole, and
20 innovation is a significant one there, so I like the idea
21 of having it tie, some of ours tie to those, which some
22 of these don't already do.

23 So I feel fairly strongly that we should -
24 - if our goal over the next nine months is to be sitting

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 here, looking at plan design, benefit design, all of
2 that, it's not just what's offered. It's how the plan is
3 structured, how it's paid. There's a lot of other things
4 here. So I feel that it might be a little too subtle to
5 suggest high value.

6 I'd like to actually use the word
7 innovation, just because it's a nice partnering to what's
8 matching the overall Exchange, and here's an opportunity
9 for us to push back on some of the offerings to say let's
10 see a little more innovation.

11 Let's see some other designs. Let's see
12 some different methodology. So that would just be a
13 counter point for me.

14 MS. O'GARA: Okay and I had some more
15 hands. Margherita and then Joe.

16 MS. GIULIANO: I'm just wondering if we
17 could, also, instead of just promoting wellness and
18 health improvement, maybe look at promoting the
19 measurement of the health and wellness improvement.

20 MS. O'GARA: Joe?

21 MR. TREADWELL: Question for Mary. When
22 you speak of innovation, you're talking about the
23 product, itself, correct?

24 MS. FOX: Yes.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MR. TREADWELL: So, to me, this last
2 bullet has nothing to do with the product. To me, the
3 bullet that talks about product is the one in the first
4 line, the Exchange promotes competition among health
5 insurers, based on price, quality and service, I think
6 that's where innovation should go. This is talking about
7 wellness and health improvement, the physical well-being
8 of the individual patient, so, to me, I don't think they
9 should be linked together. I think innovation is better
10 off with the product, itself.

11 And as far as measurement goes, that's a
12 whole different concept. Are you talking about
13 measurement of outcomes and evidence-based medicine? I
14 don't know how that ties in with -- I get it, the
15 importance of it. We need measurements in evidence-based
16 medicine.

17 I don't know if the insurance company, per
18 se, is -- when we talk about in this bullet wellness and
19 improvement, if that's the place to do it. We definitely
20 need that, because you have access to the data from the
21 database for a chronic illness, but, to me, it doesn't go
22 in that bullet.

23 MS. O'GARA: Well let's take a couple of
24 the comments one-by-one. I've added innovative products

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 to the third bullet in the preview.

2 The question of whether adding it again
3 here, and then, in terms of measurement, you may want to
4 have a separate principle about measurement. There may
5 be other things you want measured, besides --

6 MR. TREADWELL: Yeah. To me, this third
7 bullet is about let's encourage people to stop smoking.
8 Let's encourage them to take their blood pressure
9 medication, whatever medications they need, so they don't
10 go to the doctor every month.

11 MS. O'GARA: So help me with that. Let's
12 go back to Mary.

13 MS. FOX: I agree, except that I don't
14 think there's a distinction, but I was trying to promote
15 the connection between a product design that could
16 support all of these things that are going on in the
17 various provider communities, including pharmacy,
18 individual providers, hospitals.

19 There's a lot of innovation going on there
20 that is not coordinated, and, in fact, I think has been
21 at odds with the (papers on microphone) have been at odds
22 with each other, either timing, or territorial, or
23 whatever, so what I was trying to work in here was some
24 way for us to think, and, again, as a guided principle,

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 not a mandate, but some way to think about how do we
2 support all the innovation that's going on in the broad
3 health care marketplace, the delivery.

4 And there are, in my mind, ways to design
5 products and to work with plans to do that in a very
6 effective way.

7 And, again, to Bob's earlier comments,
8 it's not going to necessarily happen across every product
9 from the get go, but, as a guiding principle, I think
10 that's really important.

11 MS. O'GARA: Is there a general feeling
12 that we should include innovations?

13 MS. JAFF: Yes.

14 MS. O'GARA: Okay, so, I'll work on that.
15 What about this measurement issue? Should we add the
16 measurement piece to this? Yes?

17 MR. GALVIN: Hi. Kevin Galvin. I think
18 the measurement component of this is important enough to
19 be a separate line item, because there's so many parts of
20 -- so many things that we could look at for measurement
21 when you're talking about product design.

22 MS. O'GARA: And what are some of the
23 things that you think would be important to say about
24 measurement?

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MR. GALVIN: I'm going to leave that to
2 people, who know the products better than myself.

3 MS. O'GARA: Okay.

4 COURT REPORTER: I'm sorry. Could you
5 repeat that?

6 MR. GALVIN: I'm going to leave that to
7 people, who know more about product design than myself.

8 MS. O'GARA: What about the sense of the
9 group, in terms of the separate measurement? Joe?

10 MR. TREADWELL: How do you define
11 measurement? You're talking about outcomes, based off of
12 treatment paradigms? I'm not sure. I wouldn't even put
13 necessarily measurements and guiding principles, because
14 this is about the Health Exchange.

15 To me, a measurement is about outcome
16 studies and improving the delivery of health care, so
17 maybe that's just something that's down as an offshoot of
18 this. The data would be there if we had access to the
19 insurance websites. I don't know if it's a guiding
20 principle.

21 Guiding principle to me is about the
22 patient, the delivery of the insurance, the physicians,
23 the networks. I'm just not sure how you consider that a
24 guiding principle. A measurement to me is like from all

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 this we have the data, and, from there, we can go
2 forward, but I don't know if it's a guiding principle.

3 MS. O'GARA: Deirdre, did you want to make
4 a comment?

5 MS. HARDRICK: Just one small comment. As
6 part of the Exchange, in certifying that qualified health
7 plan, they are going to have to review and evaluate data,
8 outcome data, also, consumer satisfaction, so that may be
9 something important we want to incorporate, because we're
10 going to have to I believe maybe annually recertify and
11 look at outcomes or performance.

12 MS. O'GARA: Let me ask Bob if you want to
13 make a comment.

14 MR. CAREY: It could tie to the earlier
15 comment, about the information that's provided to the
16 consumer, that certain metrics, as we, you know -- to
17 make an informed decision, part of that may be, you know,
18 outcomes-based metrics, or customer satisfaction surveys
19 and that type of information, so maybe we can incorporate
20 this point about measurement, which is important, but
21 within the context of providing information, so that a
22 consumer can make an informed decision.

23 MS. O'GARA: Okay.

24 MR. CAREY: And the other comment is to

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Mr. Treadwell's point, about the focus of this was really
2 on the patient, because we talked about what the health
3 plan should do, and what the Exchange should do.

4 The third party, the most important party
5 in this relationship is the consumer and the individual,
6 and that was my intent when I drafted this, was to turn
7 the focus also onto the consumer about, you know,
8 innovative plan designs that promote wellness and health
9 improvement, as opposed to a pre-paid medical card.

10 MS. O'GARA: Dr. McLean, and then I'm
11 going to go --

12 DR. McLEAN: I'm Robert McLean. I agree
13 completely. I think that the idea of reporting
14 measurement to the consumers is kind of what we want to
15 say needs to be done. I don't think that we, as a
16 guiding principle, need to mandate measurement.

17 Everyone is going to be measuring
18 everything, including the various plans, is this working,
19 so I think it's kind of silly for us to say you should be
20 measuring stuff, but reporting it as a meaningful piece
21 of information to the consumer in a meaningful, easy,
22 simplified way is something that we can state in a useful
23 way.

24 MR. TREADWELL: Which is wonderful.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Imagine if you were a patient, and you were looking at
2 how many they do for MRIs, CT scans, bone scans, boy,
3 that would be great, but they just randomly -- I'd say
4 that's an easy choice.

5 MS. O'GARA: Okay. Steve, you had a
6 comment.

7 MR. FRAYNE: I think the concept here on
8 measurement is, at the Exchange level, is measuring the
9 plan relative to what it said it was intended to provide,
10 not necessarily the quality that the providers are
11 offering, which is a different set of measurements.

12 I mean, obviously, presumably that's
13 going to occur somewhere, as well, but I think having
14 something, where it says, okay, we told you we had a
15 network. For example, the State of Connecticut has done
16 secret shopper studies on the Medicaid plan and found
17 that, you know, the network was said to be X, and it
18 turned out to be something less than X, so having some
19 sort of reporting regarding, you know, here's what was
20 promised, and did the product actually deliver?

21 I'm not sure all the places where you
22 would measure it, but it seems to me you should want to -
23 - the Exchange should promote some measurements, some
24 factual measurements regarding the parameters on which

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 the plan promised to offer certain services, price,
2 quality, etcetera, to the consumers.

3 MS. O'GARA: Well I'm going to make a
4 suggestion on that, Steve. In the new separate principle
5 that we're going to speak to, the meaningful information,
6 we'll try and elaborate a couple of points on adding some
7 -- the measurement metrics to that.

8 So what I have now is I've got six
9 principles. We've done a pretty good job of tearing
10 these apart and putting them back together, and I will
11 bring them, with Bob's help, to the next meeting, and
12 you'll have a chance to reflect on them between now and
13 then, okay?

14 So that will take us, then, to the next
15 piece of the agenda, and I think that's you, Bob.

16 MR. CAREY: Yeah. So we wanted to walk
17 through sort of the list of responsibilities and the
18 timing for this Advisory Committee.

19 I will say that your plate is probably
20 more full than the other plates than the other Advisory
21 Committees. We think this one, in particular. This is
22 actually the products that will be offered, and the
23 network adequacy standards, and the essential health
24 benefits and so forth.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 We're reminded of the situation in
2 Florida. So Florida has a private Exchange, and if they
3 had products, you could purchase from this private
4 Exchange, but they have a shell, and they have a store,
5 and they have no products, so we need to be mindful of
6 the fact that, you know, it's a voluntary market on
7 behalf of the consumer, but it's also a voluntary market
8 on behalf of the insurer.

9 Insurers are not required to participate
10 on the Exchange. This is certainly an incentive.
11 There's lots of new customers that hopefully will be
12 coming through the Exchange, but I just wanted to raise
13 that, so if you go to Florida Health Choices, it says,
14 you know, coming soon, but that coming soon sign has been
15 there for a few years, so we need to be mindful of the
16 fact that we need to make it an attractive place for
17 consumers, of course, but, also, attractive and someplace
18 that insurers want to participate on.

19 DR. McLEAN: Question. This is Robert
20 McLean. So is that store empty, because of excessively
21 restrictive requirements that have come back to the
22 State, or do other issues apply in Florida?

23 MR. CAREY: No. I think the store is
24 empty, because of the fact that there are other

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 distribution channels, and the carriers are comfortable
2 with the current distribution channels, and they don't
3 see a need to participate on the Florida Healthy Choices
4 Program.

5 Utah is another example. They have, you
6 know, I think they have two carriers that participate on
7 Utah's Exchange. There used to be three carriers that
8 participate, but one of the carriers felt that the
9 administrative burdens of participating on the Utah
10 Exchange was such that, you know, they did a cost benefit
11 analysis, and they said you know what? There aren't
12 enough lives in this marketplace for me to spend the time
13 and resources to participate on this extreme.

14 Just a couple of things to keep in mind as
15 we think about how we're going to structure this Exchange
16 for consumers, recognizing that we need the products to
17 offer to those consumers.

18 DR. McLEAN: Just one other question.
19 Have other states mandated that the insurer has to, could
20 be eligible to -- state employees have to be in the
21 Exchange?

22 MR. CAREY: No. There's certainly been
23 talk. There's been considered at the legislative level,
24 about what types of requirements you're going to impose

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 on carriers, but, to date, there's been none.

2 DR. McLEAN: Well, in other states, they
3 would make a requirement.

4 MR. CAREY: No. In other states, they
5 have not yet made that requirement.

6 MR. TESSIER: It occurs to me that that's
7 an important point you're making to us, for us, and I'm
8 wondering, it seems to me, on the one hand, we've got
9 that concern, the needing to be sure that the Exchange,
10 in addition to the incentives of new business and
11 subsidized business essentially through the Exchange, is
12 a huge incentive for insurance companies.

13 We need to be careful that, as we try to
14 encourage innovative products and all the rest, then use
15 the Exchange as a vehicle to advance health care reform,
16 that we don't overdo it.

17 I'm wondering, on the other hand, we also
18 have the enormous needs of consumers, who don't have
19 health insurance coverage today, and need access to
20 meaningful programs, etcetera, I'm wondering, it seems to
21 me those are, in some ways, could be conflicting needs
22 that the Exchange needs to find a way to balance, so I'm
23 wondering if we can, and maybe you're going to get into
24 this, Bob, with the work plan, but I'm wondering if

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 there's a way to formally bring presentations to this
2 Advisory Board, Advisory Committee, from the industry.

3 I certainly don't mean to suggest that you
4 did this, but we often hear that as rhetoric. I'd like
5 to know what are the realities? What's real? What
6 appeals to the industry for the Exchange, and what's a
7 burden? Kind of where are the lines? I'd like to hear
8 that.

9 It might be informative for our
10 deliberations and our advice to the full Board. And
11 maybe the same, by the way, on consumer access and needs,
12 as well.

13 MR. CAREY: I think you're right, that
14 there is this sort of balance that you need to strike
15 with regard to promoting innovative plan designs, and
16 having information available to consumers, making an
17 informed choice, a lot of competition, based on all of
18 the things that we discussed previously.

19 The biggest issue from my conversations
20 with insurers, which I have, you know, all the time I
21 speak with insurers across the country, is, you know, is
22 it administratively -- is the "administrative burden,"
23 quote, unquote, such that it's, vis-à-vis the potential
24 membership that I will grow, is one worth the tradeoff

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 versus the other?

2 So, from my own experience, when we
3 solicited health plans in Massachusetts, there was a
4 requirement, that the health carriers all have carriers
5 with 5,000 or more lives in the individual or small group
6 market, needed to submit a, respond to a solicitation of
7 the connector issue, so this is in the winter of
8 2006/2007 for plans that will be available in July of
9 2007.

10 So all 10 that met that standard needed to
11 submit qualified health plans for the connector's
12 consideration. We wound up selecting seven, one of which
13 said thanks, but no thanks, because they felt that their
14 market share was so small in the State to begin with that
15 it was not worth it for them.

16 They did the math, and looked at whether
17 it would be worth it for them to participate on the
18 connector, and I think it really came down to, you know,
19 there are other distribution channels.

20 Now the difference in Massachusetts was
21 there weren't subsidies available on the commercial side.
22 They were two separate programs. So for people on the
23 subsidized side, you know, they wanted to participate,
24 but, on the unsubsidized side, they did a calculation of,

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 you know, is it worth it for me? I'm going to gain an
2 additional 500 members, 1,000 members, potentially. It's
3 just not worth it if you did the math.

4 So I think we need to think about it in
5 terms of any requirements that we place on carriers to
6 participate in the Exchange that are above and beyond
7 what is required in the broader marketplace, and that's
8 why we have the Department of Insurance here to help us
9 understand this goes beyond what is required in the
10 marketplace.

11 We need to be mindful of that. I think
12 that's sort of what I would suggest to the Committee, is
13 that you consider, each time you put a requirement in,
14 it's adding to the list of administrative requirements
15 that would potentially dis-incent a carrier from
16 participating, so we talked about one choice, and provide
17 the consumer with information and so forth and so on. I
18 just wanted to make that point.

19 There may be, you know, we may want to
20 have carriers come in and talk about their vision of the
21 Exchange. They certainly have visions of the Exchange
22 and how they see it working in the market, so maybe
23 that's something for the Committee to consider.

24 MR. TESSIER: And I guess I may have left

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 out we may want, even though we have representation from
2 providers of various sorts, we may also want to consider
3 outreach to the provider community, as well.

4 MS. O'GARA: Okay. Other items?

5 MR. CAREY: Okay, so, we'll walk through
6 the timeline and the tasks that we have. The meeting in
7 May, we're going to review. We've gone out to survey the
8 carriers about the products that they offer in the
9 individual and small group market.

10 We're working with the Department of
11 Insurance to summarize that information, and we thought
12 it would be helpful to come back to the Committee to show
13 you what is commonly purchased in the individual and
14 small group markets today, in terms of the most popular
15 designs, so I thought that would be informative.

16 Perhaps, most importantly, we'll also have
17 a discussion with regard to the essential health
18 benefits, so for those of you, who aren't immersed in
19 federal regulations and guidance from CMS, they issued,
20 in December, a bulletin to the states, basically
21 deferring to states to determine what constitutes the
22 essential health benefits.

23 So essential health benefits under the
24 Affordable Care Act are a list of services that must be

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 included in the benefits package that's offered through
2 the Exchange, what's called a Qualified Health Plan, and
3 they're sort of a, you know, most common types of
4 services provided, inpatient, outpatient, ambulatory
5 care, prescription drugs, mental health and substance
6 abuse, and sort of goes through.

7 The law directs the Secretary of Health
8 and Human Services to determine what constitutes an
9 Essential Health Benefit Package.

10 The Secretary of Health and Human Services
11 turned around and said, well, why don't the states figure
12 out on your own what constitutes essential health
13 benefits within the parameters set by the law?

14 And, so, the bulletin that was issued in
15 December lays out four options for states to consider in
16 setting up what constitutes Essential Health Benefits
17 Package for that state, and, so, we'll go through.

18 We're going to prepare an issue brief that
19 lays that out for you, that sort of explains, walks you
20 through what the options are, and then we'll have for you
21 a summary of the different benefits packages that are
22 available, so that the four types of benefits packages
23 included in the Essential Health Benefits Bulletin are
24 the three most popular small group plans offered in the

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 state, the largest HMO plan offered in the state, the
2 Federal Employees Health Benefit Plan, or the State
3 Employees Health Benefit Plan.

4 Those plans -- the comparison is not on
5 cost share. The comparison is on services covered, and,
6 so, we'll go through -- the cost sharing is taken care of
7 with the Gold, Silver, Platinum, Bronze, in terms of the
8 actuarial value, but the benefits that are covered across
9 those plans have to be the same, and that's what we'll
10 be discussing at the meeting in May, so that will be a
11 pretty intense conversation.

12 From that, you all will make a
13 recommendation. And, as I mentioned earlier, the
14 Essential Health Benefits Package applies to the broader
15 marketplace in Connecticut. It is not just the Exchange,
16 so it's a bigger decision, I guess, than just an
17 Exchange-focused decision, but the Exchange has a voice,
18 and you will be making a recommendation on what the
19 Essential Health Benefits Package you think should be for
20 Connecticut.

21 That recommendation will then be brought
22 to other Advisory Committees for them to weigh in, and
23 then brought to the full Exchange Board.

24 That decision needs to be finalized for

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 the State of Connecticut by September. If it's not
2 finalized by September, the federal government will make
3 that decision for you, so I think that time is of the
4 essence.

5 We have the information. We're assembling
6 it now. We'll put together an issue brief prior to the
7 meeting. We'll send that out. We'll be able to read
8 that. Come prepared for the meeting in May to discuss
9 that.

10 MS. JAFF: Are we also going to tackle the
11 basic health program in May, and, if so, how are we going
12 to do both of those issues in one meeting?

13 MR. CAREY: So we're not going to do both
14 of those issues in one meeting. I think those are bigger
15 issues. Each one is an issue unto itself.

16 So the basic health plan we think we'll
17 prepare an issue brief for the June meeting. We can
18 discuss it at the June meeting. The basic health plan,
19 for those of you less familiar with it, the ACA includes
20 an option for states to set up essentially a separate
21 program for individuals with income between 138 and 200
22 percent of FPL, so subsidies through the Exchange are
23 available between 138 and 400 percent of FPL.

24 Those below 138 percent of FPL are

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 eligible for Medicaid, but those between 138 and 200 the
2 ACA provides an option for states to segregate those
3 people, pull those people out of the Exchange, and enroll
4 them in a different health plan with potentially lower
5 cost sharing and potentially lower premiums, so we'll
6 have a discussion about what's the pros and cons and the
7 issues that you'll need to consider in recommending
8 whether the State should establish a basic health
9 program.

10 So we think that will be ripe for
11 discussion and review and hopefully a recommendation at
12 the June meeting.

13 DR. McLEAN: When you put that material
14 together, is it possible in a relatively concise way to
15 communicate what other states have done? Not the details
16 of whether they picked one versus the other.

17 MR. CAREY: Sure. Yeah and, so, they've
18 been, you know, every state is sort of going through, not
19 every state, many states are going through a similar
20 process, so there is information that we'll be able to
21 pull, analyses that were done, for example, on basic
22 health program options for California, and there was an
23 analysis that was done for New York State.

24 The staff will put together an issue

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 brief, but we'll have links or appendices that will then
2 allow you, if you want, to read a 40 or 50-page report
3 that New York State put together about the basic health
4 program, or whatever state we find, so we'll be able to
5 do that, as well.

6 MS. FOX: What does that analysis include?
7 Financial models? Outcomes?

8 MR. CAREY: So Mercer, as part of its work
9 in the fall of 2011, put together an analysis of the
10 basic health program, so we'll pull information from that
11 report and include, you know, sort of the findings as
12 best as we know it.

13 One of the problems with making a decision
14 about the basic health program is the feds have not
15 finalized or provided really any guidance, as to a
16 financing mechanism and how the basic health program will
17 be funded by the federal government, so that will be
18 included.

19 We'll be able to give you a high-level,
20 you know, read of the law, but, you know, the guidance so
21 far has been, you know, to be determined with regard to
22 the basic health program.

23 MR. TESSIER: When you put the materials
24 together and make the presentation next month, will part

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 of that also be to discuss -- we're not the only group
2 that will be -- this Advisory Board is not the only group
3 that's going to be considering and making a
4 recommendation on both of those, the Essential Health
5 Benefits Package and the Basic Health Program --

6 MR. CAREY: Correct.

7 MR. TESSIER: And unlike most of what this
8 Advisory Group will do, which is advise the Exchange
9 Board on decisions that it will make, the basic health
10 plan decision is not made by the Board, correct?

11 MR. CAREY: Correct.

12 MR. TESSIER: I'm not clear about the
13 Essential Health Benefits Package.

14 MR. CAREY: Correct. Neither one are sort
15 of the sole purview of the Exchange Board, but we feel
16 that the Exchange Board and its Advisory Committee has a
17 role to play in that, and, so, in essence, will be making
18 a recommendation for the Board to then make a
19 recommendation with regard to both of those issues.

20 I don't know if, Mary Ellen or Anne
21 Melissa, you want to talk about any work that the
22 Department is doing around the Essential Health Benefits
23 or any thinking.

24 MS. BREault: No. I think we agree with

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 you, Bob, since it really impacts the entire market. My
2 understanding, from discussions and calls with CCIIO,
3 basically, a letter will come to the Governor, and the
4 State will have to make a determination in the fall.

5 And, so, clearly, it is important for the
6 Board to weigh in, since it does impact the Exchange
7 Board, but there are impacts for the entire commercial
8 market in the State.

9 And, you know, we have worked with the
10 Exchange staff to put out the survey. CCIIO is still
11 coming out with further guidance on the determinations.
12 They came out last December with some picks. They're
13 going to redo that.

14 There may be some, based on discussions
15 from other states, there are some discrepancies between
16 their data and what we may find, so we're trying to work
17 through some of those issues, but we will present all of
18 that to the Board.

19 COURT REPORTER: One moment, please.

20 MS. O'GARA: Could you provide the English
21 description of CCIIO?

22 MS. BREault: Sure.

23 MS. O'GARA: So that people, who --

24 MS. BREault: The Department has been

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 taking calls with CCIIO. That's the -- actually, I'm not
2 even sure what it is.

3 MR. CAREY: Center for Consumer
4 Information and Insurance Oversight.

5 MS. BREULT: They keep changing it.
6 Basically, we will be working with them through the
7 National Association of Insurance Commissioners, and we
8 will bring information back to this Committee for the
9 Board's consideration.

10 MR. CAREY: Okay, so, those are two minor
11 things. Yes, sir?

12 MR. FRAYNE: Steve Frayne. I don't know
13 if you'll be able to do it or not, but one of the things
14 I think would be helpful when we get to the basic health
15 plan discussion is, to the extent it's available, if
16 someone could take a look at the eligibility for
17 individuals to enroll in Medicaid versus the eligibility
18 for the State to actually receive subsidies for those
19 individuals if they were in a basic health plan.

20 My understanding of it could be complete
21 wrong, is that, today, individuals, based on income, can
22 decide to be in Medicaid, even if they work and have
23 access to insurance through an employer, whereas
24 eligibility for subsidies through the Exchange is

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 dependent upon not having access to affordable, credible
2 insurance, so, you know, there's a lot of discussion
3 about moving populations from one side to another side.

4 I don't know that there's a good
5 understanding about if you, in fact, move them, would the
6 State actually receive all the funds that people are
7 thinking it might receive, and I think there's some need
8 to understand how one qualifies for Medicaid today versus
9 the ability and availability of subsidy, should that
10 individual wind up with the basic health plan.

11 MR. CAREY: So there is a prohibition on
12 people, who are eligible for Medicaid, from enrolling in
13 coverage through the Exchange and in the Basic Health
14 Program.

15 MR. FRAYNE: I'm talking about the folks -
16 - Connecticut currently covers individuals, for example,
17 up to 185 for adults, and they cover pregnant women I
18 think to 250, so there has been talk about perhaps moving
19 those folks out of Medicaid and putting them in the basic
20 health plan.

21 MR. CAREY: Right.

22 MR. FRAYNE: There's pros and cons to
23 doing that. The question would be, for the folks that
24 were above the 133 or 138 as stated would they, in fact,

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 be eligible for subsidies through the basic health plan,
2 if, in fact, they currently work and, in fact, have
3 credible coverage, as defined under the Affordable Care
4 Act, affordable and credible coverage?

5 It seems like it's a very much human needs
6 question, but it's an important set of needs to get a
7 good answer to, because that can have a dramatic effect
8 on how much resources would be available to the State of
9 Connecticut if they were making choices one way or
10 another.

11 MR. CAREY: Just so I understand the
12 question, so the question is people, who have access to
13 employer-sponsored insurance, who may also be eligible
14 for Medicaid --

15 MR. FRAYNE: Today.

16 MR. CAREY: Today. May choose either
17 employee-sponsored insurance or Medicaid.

18 MR. FRAYNE: Correct.

19 MR. CAREY: And the question is, if the
20 State were to offer a basic health program and
21 essentially scale back eligibility for Medicaid, would
22 those people still have that option of choosing either
23 employee-sponsored insurance or the basic health plan?

24 MR. FRAYNE: Well I think they would have

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 the choice to choose the employer or the basic. The
2 question would be they would have that choice, but they
3 would not be, the State would, in fact, not be eligible
4 for the subsidy for that individual, because whether they
5 have the basic health plan or not, usually the
6 individual, as I understand it, has to be eligible for
7 the subsidy, meaning you don't have access to employer
8 insurance, it's not affordable, and it's not credible.
9 It doesn't have a sufficient actuarial value.

10 If you don't meet all three of those
11 requirements, then there's no subsidy for you.

12 MR. CAREY: Right, through the Exchange,
13 but is the question would there be a subsidy if they were
14 eligible for -- if there was a BHP?

15 MR. FRAYNE: Correct.

16 MR. CAREY: Okay.

17 MS. JAFF: I'm sorry. This is Jennifer.
18 Isn't the BHP funded by the federal government? Isn't
19 that part of one of the huge advantages of the BHP to a
20 state like Connecticut, that could move people from
21 Medicaid to a fully-funded BHP?

22 I think there are other advantages, as
23 well, but I mean am I missing something?

24 MR. FRAYNE: The point I'm trying to get

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 at is, you're correct, they are -- funding does come from
2 the federal government, but the funding is contingent
3 upon being eligible for the subsidy. To be eligible for
4 the subsidy, you have to have no insurance, and you also
5 have to have access to -- you have to not have access to
6 affordable insurance.

7 So, for example, if I worked in a
8 hospital, and I'm a part-time employee, I would have
9 access to insurance through that hospital. Today, if my
10 income is low enough, I can decide it's too expensive for
11 me. I'd rather get free insurance from the State through
12 the Medicaid program.

13 As I understand, under the Basic Health
14 Plan Rules, the State wouldn't get a subsidy for me,
15 unless, in fact, the insurance I was getting was, A, too
16 expensive, in other words, it would cost me too much out-
17 of-pocket, and, B, it wasn't credible.

18 It didn't cover -- you know, an actuarial
19 value I think would be 60 percent, so there might not be
20 a subsidy for me, even though today I'm on Medicaid,
21 because I might, in fact, work someplace, have access to
22 insurance, and seems to be the biases towards employer-
23 sponsored insurance, not necessarily just providing
24 subsidies.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MS. JAFF: I was confused, because we
2 talked about subsidies for the, you know, the advanced
3 premium tax credits also as a subsidy, so I think that's
4 what confused me, was calling the BHP funding a subsidy,
5 but I think now I understand what you're saying.

6 MS. FOX: This is a really good example, I
7 think, of the level of information this group is going to
8 need, Bob, and, so, you know, if you go for a minute back
9 to the guiding principles, you know, what is the consumer
10 experience here, as they have to make that choice, and
11 then for us to understand the financial model, it says
12 what is it going to cost to the State, you know, what is
13 it going to cost the individual, and how does that all
14 play out? So that was a great question.

15 MR. CAREY: Okay, so, in June, we'll --
16 (multiple conversations). So we'll discuss this in
17 detail at the June meeting on the basic health plan.

18 Also, we'd like the Committee to
19 understand the current process used by the Department of
20 Insurance with regard to the review and approval of
21 benefits and rates, so the Exchange has responsibility
22 for certifying qualified health plans.

23 Those qualified health plans have to first
24 pass through a filter, known as the Connecticut Insurance

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Department, which qualifies the benefit's package and the
2 rates, the rate review and approvals, and we thought it
3 would be helpful for this Committee to understand what's
4 currently done in the State by the Insurance Department,
5 what's the responsibility of the Exchange, and is there a
6 way to leverage, or to defer to, or to work with the
7 Insurance Department in that process?

8 So folks understand, there will be a
9 universe of plans available in the individual and small
10 group market. The Exchange will sell, offer a subset of
11 those plans.

12 We'll likely not offer all of the plans.
13 The carriers will likely, you know, have plans that are
14 available outside of the Exchange, but there is a process
15 through which all those plans have to first pass through
16 a review and approval of the Department of Insurance, and
17 we thought it would be helpful for this Committee to
18 understand what that process looks like and how the
19 Insurance Department goes through to licensed carriers,
20 products for sale in the individual and small group
21 market. My friend Mary Ellen has a homework assignment.

22 Also, we'd like to bring to you
23 information about the cost sharing requirements at each
24 level, so the Exchange offers products in essentially

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 five levels, based on actuarial value.

2 Actuarial value is essentially what
3 portion of a person's medical expenses are paid for by
4 the plan, meaning, you know, as part of your premiums,
5 and what portion is paid through cost sharing in the form
6 of deductibles and co-pays and co-insurances, so, at each
7 of the tins, Platinum, Gold, Silver, Bronze, and then the
8 catastrophic plans, there's a certain percentage of
9 actuarial value.

10 So Platinum plans are at 90 percent,
11 meaning that the carrier in the form of the premiums pays
12 for 90 percent, on average, of an individual's care. The
13 individual, through co-payments and co-insurance and
14 deductibles, would pay, on average, 10 percent, and then
15 that goes down to 80/20, 70/30, 60/40, and, so, we'll
16 bring to you sort of a description of that, some examples
17 of the ways in which carriers or cost sharing works
18 across each of those tins, so people have an
19 understanding of the range of options available at each
20 of those cost sharing levels.

21 And then we'll also discuss, you know, the
22 pros and cons and what other states are doing with regard
23 to how they're approaching the offering of plans and
24 whether there's different ways in which Exchanges are

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 thinking about this.

2 Some are thinking the way that
3 Massachusetts does it is that they standardize the cost
4 sharing, so when you go to look at a Bronze plan in
5 Massachusetts, each of the carriers there's no
6 difference, in terms of the cost sharing, so there might
7 be a \$500 deductible, and, you know, 20 percent
8 coinsurance, and an out-of-pocket max of, you know,
9 \$6,000.

10 All of the plans are the same. We talked
11 earlier about choice and innovation, and, so, we'll want
12 to weigh, you know, are there ways in which you might
13 standardize some things, and a lot of innovation on other
14 things, or do you simply allow the carriers to, you know,
15 develop the products that they think are attractive to
16 the marketplace, and, so, we'll have that discussion as
17 part of the cost sharing across each of those plan
18 levels.

19 In July, we'll review options and develop
20 recommendations regarding those plan designs, so we'll
21 review the different cost sharing in June, and then make
22 a recommendation about what specifically the Committee
23 would like to see with regard to plan designs in the
24 individual and small group market, and we'll also talk

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 about distinctions that may exist between the individual
2 and the small group market, so there are different
3 products available on the individual side versus the
4 small group, and the Committee may want to recommend to
5 the Exchange Board that the Exchange Board offer or allow
6 the carriers to offer different products in the
7 individual market versus the small group market.

8 And then we'll also make a recommendation
9 on the numbers of plans that we recommend that Exchange
10 allow carriers to offer at each of the tins.

11 So that's a relatively big chunk of work
12 that we'll need to get through in July. So folks know,
13 so our current thinking with regard to the sequence of
14 events from the solicitation perspective, so essential
15 health benefits needs to be finalized in September.

16 We're planning on issuing, you know, a
17 Notice of Intent to issue a solicitation in November to
18 develop that solicitation, in terms of what we're asking
19 of the carriers, what type of criteria will be used to
20 select the qualified health plans.

21 All of that will need to be finalized by
22 the end of 2012. Carriers will have a couple of months
23 to develop and to offer products and determine what types
24 of products they want to offer to the Exchange.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 That will take us into, you know, early
2 spring of 2013. The Exchange Board will need to make a
3 decision about what are the products that we're going to
4 offer consumers to purchase in October of 2013.

5 We'll then need to work with the carriers
6 to get them integrated into the Exchange's enrollment and
7 billing system, and then, you know, hopefully flip the
8 switch on October 1 of 2013 and offer products to
9 consumers in the individual and small group market, so
10 the timing is such that you need to make important
11 decisions in the summer and fall of 2012, in order to
12 allow for sufficient time for carriers to offer their
13 products to the Exchange, to review that offer, and then
14 to begin open enrollment.

15 And in August of 2012, we'll also talk
16 about pediatric dental benefits, so there's a provision
17 in the law that talks about the requirement for the
18 Exchange to offer pediatric dental benefits either as
19 part of the package of benefits offered through the
20 qualified health plans, or as standalone dental benefits,
21 and we'll go through a discussion of the pros and cons of
22 that, and the committee will make a recommendation on
23 that.

24 In September, we'll finalize the

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 certification criteria. How is the Exchange going to
2 determine whether a plan is a qualified health plan and
3 meets certification, and we'll go through the different
4 metrics or criteria that this group wants to set with
5 regard to health plans that will be offered through the
6 Exchange. That will be a recommendation to the Board,
7 and then we'll finalize that and prepare that
8 recommendation for the Exchange Board in September.

9 So that's the timeline for the next six
10 months or so. There's lots to do, certainly with regard
11 to the essential health benefits and the basic health
12 plan and the certification criteria.

13 Any questions? Oh, and just so the
14 sequence, so folks understand, you know, how this will
15 roll out, we'll prepare, you know, issue briefs, as
16 appropriate, for the topics, send those out in advance of
17 the meeting, allow people to review and digest those, and
18 then, at the meeting, we'll have a presentation, and we
19 can have a, hopefully, a more informed discussion, since
20 it won't be so brand new to people, who are just showing
21 up for the meeting.

22 MS. JAFF: Can I just make a suggestion?
23 When we talk about dental benefits, that perhaps we might
24 want to reach out to the Connecticut State Dental

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Association and possibly COHIB(phonetic), as well.

2 MR. CAREY: Yeah. Good idea.

3 MS. O'GARA: Any other questions for Bob
4 on the work plan?

5 MR. TESSIER: One quick one, Bob. Did I
6 hear you right? In May, when we were talking about the
7 essential health benefits and the basic health plan,
8 you're going to present materials and information to us,
9 but reviewing discussion and decision at the June
10 meeting. Did I hear that?

11 MR. CAREY: Yes, sir?

12 MR. TESSIER: So that's a different --

13 MS. CINTRON: We were going to move that
14 down.

15 MS. O'GARA: Yes, Mark?

16 MR. ESPINOSA: Mark Espinosa. Just to
17 pick brains here, not to be a naysayer, I'm trying to get
18 a lot of information from my organization in Washington.
19 My International Union is very in tune with President
20 Obama and Vice President Biden, and has a lot of meetings
21 and whatnot, so I'm trying to get as much information out
22 of them as I can, and I'm not able to get anything new.

23 I'm just wondering if -- in fact,
24 tomorrow, I'm attending a conference by my consultant,

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 that's putting on a seminar in Boston about these very
2 issues.

3 My question is are there backup plans, you
4 know? What thought, if any, has been given to the fact
5 that things are very touch and go right now, obviously,
6 pending a decision from higher on in June?

7 Not to say it's all for naught, but I'm
8 just wondering, like, you know, what type of backup
9 plans, because if it's ruled unconstitutional, that's one
10 thing. If it's not and federal funding is hampered by a
11 political agenda after November, I'm just curious about
12 that, the amount of work that's going into this and the
13 preparation of it.

14 You're talking timelines, and that's fine,
15 and that has to be stuck to. I understand that, but I
16 have not been given any answers yet, in terms of what do
17 you do next? What do we do next?

18 Do we just wait and see and just go
19 forward, as if?

20 MR. CAREY: Yeah. I think that that's the
21 strategy. To be honest, we're under such tight
22 timelines. We can't wait for the -- we can't put
23 everything on hold until June and then say go or no go,
24 that there's things that we can do and should do between

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 now and the Supreme Court ruling.

2 I guess my thinking is they may toss the
3 individual mandate. I'd be surprised if they toss the
4 whole thing, but, if they do, we'll have to adjust and
5 figure out how to move forward, but I think -- you know,
6 I was in Alabama on Monday. Not a state that is standing
7 up and cheering the health reform law, but they recognize
8 that, you know, we've got to move forward and do things.

9 If there's a change in the law, then we'll
10 change our approach, but, until that point, I think, you
11 know, the law is the law until it's not anymore. That
12 would be my suggestion, that we not -- yes, it's out
13 there. You can't avoid it.

14 We had a discussion yesterday about with
15 the Outreach Committee, and our vendor, Mintz & Hoke, was
16 talking about needing to get information out there, and I
17 said, well, I wouldn't want to put out information that,
18 you know, I then I have to correct in June.

19 And, so, you know, you've got to be
20 careful about what you're telling people. If you tell
21 people, oh, these subsidies are available in January of
22 2014, and then have to issue a, well, maybe there won't
23 be subsidies available, so my view is we keep moving
24 forward, we adjust as circumstances change.

POST REPORTING SERVICE
HAMDEN, CT (800) 262-4102

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 Maybe we get through June, and then we
2 have to wait until November, and then there will be
3 potential changes in November. So I guess that would be
4 my suggestion to the Committee.

5 I was also in Washington. CCIIO is moving
6 ahead, as if nothing is going on. Nobody mentioned
7 anything about a Supreme Court case. It's pretty funny
8 the disconnect, you know, a couple of miles down the road
9 they're talking about something, and, yet, they keep
10 moving forward.

11 MS. FOX: I also would say that, because
12 of the level of commitment, you know, the Lieutenant
13 Governor being Chair of the Board of the Exchange, and
14 indicators from our Governor, that there is recognition
15 of a serious issue of the uninsured in Connecticut, and
16 there's a commitment to solve for that.

17 It may look different, you know, after
18 June, but --

19 MS. O'GARA: Okay, so, we have a couple of
20 remaining questions. One is, what do we need to be doing
21 between now and our next meeting, so we're going to talk
22 a little bit about what's the agenda, and then we can
23 talk about the tasks that need to occur.

24 One of the things that's not on here is

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 that we will get you these modified principles, so that
2 you'll have a chance to take a look at them.

3 As is already articulated, information
4 that the basic health plan is not going to be on there.
5 It will be in June. So, primarily, it will be the survey
6 of carriers and the EHP, right?

7 MR. CAREY: Right.

8 MS. O'GARA: And those will be out to you
9 well in advance of our next meeting. The next meeting,
10 dates are hard to pick, and we put a date up here. We
11 kind of want to get a feel for the temperature on that.

12 That would be about a month from today.
13 It's a Wednesday morning. It could be that week, or it
14 could be the following week, is what we learned, right,
15 Tia?

16 MS. CINTRON: Yes.

17 MS. O'GARA: So if people could just kind
18 of look at your calendars? I don't know if you want to
19 give us a sense of that now. We're also prepared to send
20 out a Doddle, is what it's called, to find out when we
21 can maximize participation for the next meeting.

22 MS. CINTRON: One of the groups had some
23 issues with the week of the 7th, so we were talking
24 tentatively about looking at the week of the 14th.

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 MS. JAFF: The week of the 14th, there
2 were quite a few people on the Consumer Committee, who
3 wouldn't be able to make it, including one of the co-
4 Chairs.

5 MS. CINTRON: Okay. Yeah. So maybe the
6 most effective way, if this is appropriate, is just to
7 get out a communication, and we'll do our best to see
8 what's convenient for the majority.

9 Is this time of day reasonable for all of
10 you?

11 MS. O'GARA: Okay. We have the last thing
12 on the agenda, was public comments, and what we'd like
13 you to do, if you could, is come forward and state your
14 name and come in front of the mike, so we can get you on
15 the transcription.

16 MR. GREG WILLIAMS: Any mike?

17 MS. CINTRON: Any mike.

18 MS. O'GARA: Any mike.

19 MR. WILLIAMS: Hi. My name is Greg
20 Williams, and I'm a Connecticut resident, and I have a
21 question just about the Mental Health Parity and
22 Addiction Act.

23 Just so you know where this question is
24 coming from, I worked at the federal government last

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 summer for SAMHSA on their Health Reform Office, and we
2 worked with CCIIIO, and my first job was to figure out
3 what that stood for, but my second job was to survey
4 insurance plans from around the country on the Essential
5 Health Benefit Package.

6 One of the biggest challenges that work
7 group had to make recommendations to the Secretary was
8 the discrepancy between the Mental Health and Addiction
9 Parity Act and the Essential Health Benefit and what's a
10 typical employer plan.

11 And just as this group plans to address
12 pediatric and dental provisions in the ACA, I think it's
13 very important for this group to look at not only the HHS
14 bulletin and Mental Health and Addiction Parity Act and
15 how that's been expanded within the ACA, but, also, to
16 understand that typical employer plans and your options
17 that are going to be laid out may not comply with the
18 2008 federal regulations for Mental Health and Addiction
19 Parity.

20 And, so, it's a very complex and in the
21 weeds question, but it's very impactful, and it's almost
22 -- it, actually, even at the ACA, has problems. This law
23 still can stand, so, obviously, the State of Connecticut
24 has to address it one way or the other, and I just

POST REPORTING SERVICE
HAMDEN, CT (800) 262-4102

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 thought that, I was wondering how this Committee was
2 going to handle that.

3 MS. BREault: Just to address, that the
4 State of Connecticut does have legislation with regard to
5 Mental Health Parity. We've had it for some years, and
6 it goes well beyond the federal Mental Health Parity Act.
7 We require mandate coverage for Mental Health Services in
8 all markets, individual, small group, large group, and we
9 do have parity as a requirement.

10 So even, you know, despite what would
11 happen with the federal reform, Connecticut would still
12 require that all fully insured plans currently have that
13 coverage.

14 MR. WILLIAMS: Does that include substance
15 abuse?

16 MS. BREault: Yes. Absolutely.

17 MS. O'GARA: Yes, Jennifer?

18 MS. JAFF: Yes. If I could just say, I
19 mean, there is a huge issue, in terms of enforcement of
20 Mental Health Parity at both the state and federal level,
21 not so much plan design as plan operation and whether
22 things actually get covered and whether the prior
23 authorization procedures are the same and that kind of
24 thing, so I do think it's a tremendously important issue

RE: CONNECTICUT HEALTH INSURANCE EXCHANGE
APRIL 11, 2012

1 and one that needs to stay on the table as we look at the
2 EHB.

3 MS. O'GARA: Thank you. Are there any
4 other comments from the public? Okay. At this point,
5 then, Anne Melissa and Mark, we'll hand it back to you,
6 in terms of we've concluded our agenda, and I think you
7 can ask for adjournment.

8 MS. DOWLING: Thank you to all of you for
9 setting up this Committee.

10 MR. ESPINOSA: Very helpful. Thank you.

11 MS. O'GARA: Thank you, all, for coming.

12 (Whereupon, the meeting adjourned at 10:54
13 a.m.)
